PRESERVATION OF OUR TREES

The Association is embarking on a tree preservation project. We have hired the services of a tree expert, Professor Vicente L. Saplala, to undertake a comprehensive study.

This project will include:

- Prune overly grown trees to an appropriate height to allow sunlight and stronger branches.
- Cut down some trees to their base to encourage new and strong basal growth.
- Remove excessive and unnecessary trees and plants, particularly those that are planted very close to each other and will never grow well.
- Put identification plates on certain representative trees.

Our concern for the environment is the primary motive in approving this project. By pruning some trees and cutting down others to improve growth we hope to beautify our sidewalks.

You will be seeing Dr. Saplala and his crew performing their tasks. Please know that they are professionals who are trained to conserve and preserve the landscape.

If you have any questions, please call our Village Manager, Mr. Mamerto R. Rodriguez at tel. no. 817-3316.
