GUIDELINES ON FUMIGATION SERVICES

Dear Residents:

The Association office has been receiving several complaints from residents regarding fogging/fumigation services being conducted by pest control companies contracted by property owners and/or tenants in their residences. The most common complaints have been:

- Smoke emanating from the fumigation is bad for their health and that of their pets;
- Fumigation is done during mealtime;
- Noise from the fumigation motor disturbs the peace and quiet.

To address the concerns as above-mentioned, we are issuing the following guidelines for compliance before fumigation is conducted:

- Chemicals that are environment-friendly and not harmful to both humans and animals should be utilized and;
- Immediate neighbors (In front, at the back and beside the subject residence) should be informed in writing at least 24 hours before the fumigation so that they can make the necessary preparations.

Your cooperation in this regard will ensure the peace and harmony of our Village.

Thank you.

LESLIE ANNE T. CRUZ
