WATER CONSERVATION

Dear Residents:

This is an appeal to all residents to help in water conservation.

During summer months, water supply from the source normally becomes critical. As we all know, water is a precious commodity which must not be wasted. It is for this reason that everyone should conserve water so that we can have enough water supply until the coming of the rainy season.

In this regard, we encourage everyone to adopt water conservation measures. Attached are some household tips on conserving water, in English and in Tagalog, for your ready reference.

Thank you very much.
