July 18, 2019

Update on Water Supply

Dear Residents,

We have been working closely with Manila Water to alleviate the low water pressure that you have been experiencing over the last few months. We are happy to announce that as of July 9, 2019, five deep wells have been activated and connected to our water system. These deep wells, which augment the water supply our Village receives from Manila Water's main line, have a collective capacity of 5.4 million liters per day, which is equivalent to over 90% of the daily water needs of our Village.

Rest assured that we will continue to work with Manila Water to improve the supply of water in our Village.

We hope that even as the water pressure in our Village has improved, your households will continue to use water wisely and efficiently.

Thank you.
