D.V.A. Circular No. 2019 - 24

October 23, 2019

ROTATIONAL WATER SERVICE INTERRUPTION

Dear Residents:

We are reprinting the Advisory we received from the Manila Water Company Inc. dated October 21, 2019 which we received on 22nd-Oct-2019.

“The water level at Angat Dam continues to decline due to minimal inflows. If conditions do not improve, Manila Water may begin implementing the following **rotational water service interruption beginning October 24, 2019:**

Barangay / Area	Schedule of Interruption
Dasmariñas	From 12AM – 4AM

This may be necessary because we want to ensure that the still-limited raw water supply will last through summer and the rest of next year despite Angat Dam being unable to reach its ideal 212M level by the end of 2019. We call and enjoin our customers to use water wisely and responsibly. **Please store water when available**, and just at enough amount to serve your needs during hours of service interruption.

We request for your cooperation should we begin to implement the rotational water service interruption to ensure we have enough water supply in the coming months. Please be assured that we will regularly release advisories and bulletins on specific schedules of water service interruptions ahead of time.”

We have checked with Manila Water and they advised us that four of the deep wells we have within the village are fully running and operational. As per our previous circulars on this subject, this means that the rotational water interruption may have less of an impact on the village. Nevertheless, we urge mindful and responsible water consumption.

Please be guided accordingly.
